A woman is walking in a street in India, wearing a vibrant, multi-colored striped sari. She is also wearing a blue and white patterned scarf, a black hat, and sunglasses. The background shows a street with buildings and a small cart.

A Tradition Of Luxury

A variation of the process exists in which the silk worms are allowed to leave before the cocoons are soaked in boiling water to soften the silk. Then the fibers are reeled. Single shelled cocoons are collected and then boiled to extract the silk yarn. Reeling is a very important part in the manufacturing of silk.

Style is always in fashion.

A variation of the process exists in which

the silk worms are allowed to leave before the cocoons

are soaked in boiling water to soften the silk,

and then the fibers are reeled. Single shalins.

oval-shaped cocoons are collected and then boiled to extract the silk yarn.

Boiling is a very important part in the manufacturing of silk.
